

Corn Weed Scouting Checklist

Pre-burndown

- **Timing:** Before spring burndown applications
- **Ask:** What weeds are present?
- **Tip:** Adjust chemistries to control weeds.

Post-burndown

- **Timing:** After burndown can take effect
- **Ask:** Was burndown successful?
- **Tip:** Adjust preemergence plans if unsuccessful.

Postplant

- **Timing:** Less than two weeks after planting
- **Ask:** Did any weeds escape preemergence?
- **Tip:** Apply timely postemergence.

In Season

- **Timing:** At least every two weeks
- **Ask:** What weeds, pests and diseases are present?
- **Tip:** Take detailed notes to keep track.

Harvest

- **Timing:** When you're in the combine
- **Ask:** What weed populations are present?
- **Tip:** Use data to inform next year's plans.
